

POLICY: 30-155

DATE: May 24, 2011

Subject: Large Single Load

I. PURPOSE:

To set forth the practices and procedures that shall be followed by the Cooperative for customers with new loads of one (1) megawatt (MW) or more.

II. TYPE OF SERVICE: Three phase, 60 cycle, served at a voltage available and approved by OCEC

III. POLICY CONTENT:

Load associated with a new facility or expansion of an existing facility. This rate applies to customers that would have an additional electrical system demand of (1) megawatt (MW) or more in any calendar month of a year. The member will be required to negotiate a customized power sale contract between the member and OCEC prior to OCEC providing any electrical service to the member. The member must provide OCEC with a detailed and verifiable estimate of the member's electrical power requirements prior to the development of a power sales contract.

The negotiated power sales contract shall identify special circumstances, terms, rates and other conditions as required to serve the customer.

IV. RESPONSIBILITY:

The General Manager is responsible for implementation of the policy.

ATTESTING:

President

Secretary
